SUMMARY

I am enrolled in a study program, building strong foundations in Python, SQL, CSS, and HTML. I also have good basics in C# and C++, as well as familiarity with the (.NET Framework). This makes me a strong candidate for starting a career as a developer.

SKILLS

Languages: Python, C#, C++, SQL, HTML, CSS.

Technologies: GitHub/Git, Django, Flask, Linq, React.

Frameworks: (.NET).

PROJECTS

C#, SQL,
(.NET framework),
Linq

StockCounter

<https://github.com/The-Robby/StockCounter>

I have created a Stock-Counting application for my current job. Sometimes, we encounter shortages, and therefore, I created this app to assist me alongside my colleagues.

Python, SQL, CSS,
HTML, Flask

End-Year Project (still in development)

For this year's class, we are to develop a webshop using Python, SQL, Flask, etc. So, this is still in development.

Python,
PySimpleGUI

MonthlyPaymentsCalc

<https://github.com/The-Robby/MonthlyPaymentCalc>

Made this app to track every monthly, quarterly and yearly payments (Subscriptions, taxes, insurance etc...)

C#,
(.NET framework)

Logger

<https://github.com/The-Robby/Logger>

This is an app where we'd fill in what we did and when, so if there were an error in the future, we could find what went wrong.

C#,
(.NET framework)

Hour Calculator

<https://github.com/The-Robby/WorkDayCalc>

This was my first app that I built, which calculates the time left for various tasks, etc. This was also my first fully developed app used by me and my colleagues.

EDUCATION
